Personal Profile

A Northcoders graduate who has previous experience within administration and customer service. I decided to start my developer journey, and change careers, in order to have the opportunity to face new challenges, learn new skills and be able to create applications which can improve people's day to day lives. Northcoders is an industry led bootcamp, which has taught me a variety of technical skills which can be translated into working efficiently in Junior roles.

Technical Skills

Languages: JavaScript, Typescript

Front End: React, React Native, HTML, CSS3, CSS Frameworks

Back End: Express, SQL, Firebase, Node.js

Testing: Jest

Experience

Northcoders

Coding Bootcamp Student

Leeds

June 2022 - September 2022

- Attended a 13 week coding bootcamp where I learnt full stack software development taught using an industry led curriculum.
- Throughout the bootcamp was taught best practices such as Agile, Test Driven Development, pair programming and git version control.

Front-end Project - NC - News website - a reddit style news website which was built using React.js and designed using CSS3

Technologies used:

React.js – CSS3

Final Project - Full Stack - Scan N Pan - a mobile recipe app which lets you use your leftover ingredients and match them with recipes. React Native was used to build the app and Firebase was used to create the backend api to store the recipes and was also used to add authentication functionality to the app

Technologies used:

React Native – Agile Development – Firebase - CSS3 - Expo
